BSI Universal Decimal Classification Online

The world's foremost classification system for organizing information in any medium

What is UDC?

The Universal Decimal Classification (UDC) is a system for classifying all fields of knowledge, as well as a sophisticated indexing and retrieval tool.

First published over 100 years ago, UDC has developed into an internationally used highly flexible and effective system for organizing bibliographic records for all kinds of information in any medium.

BSI holds exclusive rights to the English language version of UDC. Our current product portfolio includes:

- BSI UDC Online
- Universal Decimal Classification Volume 1: Systematic Tables
- Universal Decimal Classification Volume 2: Alphabetical Index
- Universal Decimal Classification, Abridged Edition
- The Universal Classification: A Guide to its Use

BSI UDC Online

The BSI UDC Online product is well suited to indexing non-traditional media, multi-media collections, motion pictures, map collections, art collections and web-based directories of learning resources.

Why use BSI UDC Online?

BSI UDC Online is an enhanced version of the Complete Edition. The enhanced functionality includes:

- Number building facility to help construct complex UDC numbers
- Ability for multiple search strategies.

BSI UDC Online can be used to index anything to exploit a field of interest to the full, and to enable efficient retrieval of information. UDC is commonly used to arrange directories on the internet.

Its main strength is that it preserves a logical structure and works equally well whether it is used only at an abridged level or applied to its full extent.

Who should use BSI UDC Online?

With the growing need for information retrieval, BSI UDC Online can be used by anyone who has large amounts of data to monitor, such as:

- Print media
- Magnetically, optically or electronically recorded information (e.g. DVD, CD-ROM, videotape)
- Sound recordings
- Web pages
- Objects in a collection (e.g. museum pieces, art objects, coins, stamps).

Any collection needs to be organized in such a way as to enable users to find what they want, while excluding irrelevant items. BSI UDC Online is a means of achieving this effectively.

A one-year BSI UDC Online subscription offers:

- Complete content of the UDC database
- Number building facility helps you to construct complex UDC numbers and see the results developing on screen
- Search (multiple strategies) and view online
- Cut and paste functionality - save time, effort and avoid transcription errors
- User-friendly screens and navigation
- Database search for specific terms and numbers. Use customized dictionary or hierarchy of UDC numbers to refine results.

Universal Decimal Classification – Abridged Edition

The abridged version of UDC is a useful reference for students, as it contains a selection of the most commonly used codes. It is a more affordable, portable and compact version than the complete UDC.

The UDC Abridged edition replaces the Pocket Edition and has been abridged from the material in the official UDC database, the Master Reference File (MRF). It lists c 4,100

classes and includes the properties table (1k-02) and revised classes for management, religion, population, tourism, social welfare, environment studies, biotechnology and cinema.

The Universal Decimal Classification: A Guide to its use

Revised Edition I C McIlwaine

Intended as a source of information about the scheme, for practical usage by classifiers in their daily work and as a guide to students learning how to apply the classification. It provides a wealth of examples to illustrate the ways in which the system can be applied, and outlines the history and development of UDC.

It includes:

- Practical hints on UDCs application
- Worked-through auxiliary and main tables. The aspects that need to be noted in applying the scheme are highlighted
- Guidance on the use of the MRF
- Discussion on how the classification is used in the 21st Century and its suitability as an aid to subject description in tagging metadata and or application on the Internet
- All the changes that have been made to the classification.
