

Last reported editions of the Universal Decimal Classification (UDC)

Last updated: 10 March 2011

This bibliography contains information about last reported, published UDC editions in 40 languages listed in alphabetical order of languages. For each language we provide information about the publisher i.e. organization that is/was responsible for publishing and updating of UDC in that language; bibliographic reference of the last editions that were reported in that language; the script in which editions were published; the source from which this bibliographic reference was taken; an overview about editions scope, format and medium (full, medium, abridged, CD-ROM, Web); and any additional information about the edition if available.

This bibliography does not include information about translations available online in the UDC Summary (<http://www.udcc.org/udccsummary/php/index.php>), thus translations of Armenian, Bengali, Greek, Hindi, Malayalam, Marathi, and Tamil are not reported here.

Information about updated and corrections can be sent to editorial@udcc.org.

Main organization

National and University Library of Iceland (Landsbókasafn Íslands - Háskólabókasafn) - <http://www.bok.hi.is/>

Script

Latin

Additional notes

The reference included here has been verified and corrected by a librarian in IceTec - Technological Institute of Iceland, Reykjavik in 2004. Dubuc's date is changed from 1957 to 1953 according to the National Library of Iceland database (<http://www.gegnir.is/>). This is a special edition of a decimal classification system used in municipal archives, especially in Reykjavik. Information on the book states that this is an abridged edition containing only 351 principal divisions. Translation is based on the Danish edition "Dansk kommunal decimal klassifikation, Koldin, 1951" which is again translated/adapted from the German "Dezimalklassifikation. Deutsche Gesamtausgabe 1934-48"

Additional notes

Lithuanian translation of the UDC started in 1995, based on the MRF, and is produced and maintained in a Lithuanian/English UDC database by National Library of Lithuania. This database is used as tool for indexing and retrieval (Gobyté, 2000). The first Lithuanian complete edition is planned in 22 volumes, with the first volume published in 2006
